NEWS RELEASE

OPEL International Champions Its Product Innovations at the Annual and Special Meeting

Shelton, CT and Toronto, ON, June 24, 2010 – OPEL International Inc. (TSX-V: OPL) (“OPEL” or “the Company”), a leading global supplier of high concentration photovoltaic (“HCPV”) solar panels and trackers, announced that its Annual General and Special Meeting (“AGM”) took place on June 18, 2010 and that the shareholders approved the re-election of the Board of Directors as presented in the proxy materials. In a subsequent Board Meeting that followed the AGM, the Board reappointed the following executive officers for OPEL International:

Leon M. Pierhal, President & Chief Executive Officer
Michael McCoy, Treasurer & Chief Financial Officer
Francisco Middleton, Chief Operating Officer and Vice President of Marketing
Dr. Javier Berrios, Vice President of Engineering
Patricia V. Agudow, Vice President of Administration, Public & Government Relations
Michel Lafrance, Corporate Secretary

The shareholders also approved the appointment of Marcum LLP, Accountants & Advisors, of New Haven, Connecticut, as the auditors of the Company for the ensuing year.

In addition to the usual matters determined at the AGM, the shareholders approved special resolutions to change the name of the Company to ‘OPEL Solar International Inc.’ and to continue the Company from the Province of New Brunswick into the Province of Ontario (the “Continuance”). The purpose of the name change was to reflect the nature of the primary business of the Company. The purpose of the Continuance was to simplify the Company’s administrative and regulatory requirements, especially since the Company had no significant connection to New Brunswick other than its reporting obligation under the New Brunswick Business Corporation Act (NBBCA). In addition, shareholders approved ancillary by-law amendments required in connection with the Continuance.

This year’s AGM contained special new aspects such as product displays of both OPEL Solar and ODIS, providing the shareholders a view of the technology advancements of the Company’s products. Shareholders were presented with an update by Leon Pierhal, the Chief Executive Officer of OPEL, on the status the Company from management’s perspective, along with management’s vision for a successful future and revenue outlook as previously announced by OPEL.

Frank Middleton, the Chief Operating Officer & Vice-President of Marketing for the Company’s solar products also made a presentation to the shareholders. This included how the innovative improvements in the HCPV Mk-I solar panel have resulted in market leading power generation efficiency exceeding 28 percent. Middleton also announced the TF-800 tracker system upgrades,

allowing the tracker to be secured in the ground with I beams versus the need for concrete footings and its improved electronic controls and SCADA support that impact the TF-800's O&M efficiency and monitoring capabilities. Middleton emphasized that all of the advancements in the OPEL Solar product line will yield cost savings for customers along with increased electric power production per area of land.

Following the presentation of the solar products, Mr. Pierhal showcased the OPEL's affiliated company, ODIS Inc. ("ODIS") for the first time to shareholders. In order to give the audience a better understanding of the business and potential for large revenue contribution from ODIS, shareholders were informed on the research and development of ODIS's main product. This product is focused currently on increasing the speed and decreasing the energy usage in the general purpose server, desktop and laptop microprocessor markets for consumer applications. Management believes that such ongoing developments are approximately eight to twelve months from completion and could help to create added shareholder value.

Mr. Michael White of IBK Capital ("IBK") addressed the shareholders and spoke about IBK past accomplishments in raising capital for emerging companies such as OPEL. Mr. White reported on the status of the financing which is expected to be successfully completed by mid July.

###

About OPEL International Inc., OPEL Solar, Inc. .

With operations headquartered in Shelton, CT and Toronto, Ontario, Canada, OPEL designs, manufactures and markets high performance concentrating photovoltaic ("HCPV") panels to transform solar energy into electricity for worldwide application. OPEL's high performance photovoltaic concentrating panels generate up to 40 percent more kilowatt-hours than conventional flat plate silicon or thin film solar panels, resulting in more cost-effective electricity generated from the sun. OPEL also markets a complete line of precision dual and single axis solar trackers to mount solar panels for optimum power output. OPEL also designs infrared sensor type products for military, consumer, industrial and commercial applications.

A leader in gallium arsenide and solar photovoltaic technology, the Company has been awarded 32 patents and has 18 more patents pending. OPEL's common shares trade on the TSX Venture Exchange under the symbol "OPL". For more information about OPEL Solar, Inc., please visit the Company's website at www.opelinc.com. OPEL Solar, Inc. is a subsidiary of OPEL International Inc. (TSX-V: OPL).

Dated June 24, 2010

This news release contains "forward-looking information" (within the meaning of applicable Canadian securities laws) and "forward-looking statements" (within the meaning of the U.S. Private Securities Litigation Reform Act of 1995). Such statements or information are identified with words such as "anticipate", "believe", "expect", "plan", "intend", "potential", "estimate", "propose", "project", "outlook", "foresee" or similar words suggesting future outcomes or statements regarding an outlook. Such statements include, among others, those concerning OPEL's anticipated operational plans and activities including the revenue and growth outlook for the next 18 months, the status of OPEL's existing and potential projects, and the anticipated activities of OPEL's third party relationships.

Such forward-looking information or statements are based on a number of risks, uncertainties and assumptions which may cause actual results or other expectations to differ materially from those anticipated and which may prove to be incorrect. Assumptions have been made regarding, among other things, management's expectations regarding future growth, plans for and completion of projects by OPEL's third party relationships, availability of capital, and the necessity to incur capital and other expenditures. Actual results could differ materially due to a number of factors, including, without limitation, operational risks in the completion of OPEL's anticipated projects, delays or changes in plans with respect to the development of OPEL's anticipated projects by OPEL's third party relationships, risks affecting OPEL's ability to execute projects and market its solar products, risks inherent in operating in foreign jurisdictions, the ability to attract key personnel, and the inability to raise additional capital. Additional assumptions and risks are set out in detail in OPEL's Annual Information Form, available on SEDAR at www.sedar.com.

Although OPEL believes that the expectations reflected in the forward-looking information or statements are reasonable, prospective investors in OPEL's securities should not place undue reliance on forward-looking statements because OPEL can provide no assurance that such expectations will prove to be correct. Forward-looking information and statements contained in this news release are as of the date of this news release and OPEL assumes no obligation to update or revise this forward-looking information and statements except as required by law.
